31	13,0	20,0	1,0	Coperto, temporali sparsi
Med.Tot.	14,3	26,2	137,0	

RIEPILOGO			
GIORNI DI PIOGGIA	9	Mese anomalo ancor più di luglio, tutt'altro che estivo, molto più autunnale, sia per l'instabilità continua e per le precipitazioni abbondanti, sia per le temperature inferiori alle medie. L'Umbria peraltro è stata solo sfiorata dalle alluvioni che hanno duramente colpito le regioni del medio Adriatico.	
TEMPERATURE MIN °C	12,0		
TEMPERATURE MAX °C	31,0		
PIOGGIA MAX 24h (mm)	54,0
