Temperature

| Riepilogo |  |  |
| :---: | :---: | :---: |
| Giorni di pioggia | 7 | Importanti precipitazioni si sono accumulate intorno alla metà del mese un po' in tutta la regione colmando un deficit di piovosità che cominciava a preoccupare. Le piogge sono state in genere moderate ma frequenti e sono generate da una insistente circolazione depressionaria centrata sull I'talia. |
